Volume Contents

JANUARY

Lectures presented at the 11th European Conference on Analytical Chemistry (EUROANALYSIS XI), Lisbon, Portugal, 3–9 September 2000

vi Preface, *M. F. Camões*

1 Analytical advantages of using electrochemistry for atomic spectrometry
E. Bulska

9 *In situ* speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals
H. Zhang and W. Davison

17 A glance into the bulk of solvent polymeric pH membranes
E. Lindner, R. E. Gyurcsányi, and B. D. Pendley

23 Affinity electrochemical biosensors for pollution control
M. Mascini

31 Devices for ion-sensing and pX measurements
J. D. R. Thomas

39 Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes
H. P. van Leeuwen and J. P. Pinheiro

45 Detecting and circumventing sources of inaccuracy in flow analysis
E. A. G. Zagatto, F. R. P. Rocha, P. B. Martelli, and B. F. Reis

Lectures presented at the XVIth International Symposium on Medicinal Chemistry, Bologna, Italy, 18–22 September 2000

viii Preface, *G. Ronsisvalle*

55 New developments in anti-HIV chemotherapy
E. De Clercq

67 Continuing evolution of the drug discovery process in the pharmaceutical industry
E. Ratti and D. Trist

Lectures presented at the International Symposium on Green Chemistry, Delhi, India, 10–13 January 2001

x Preface, *J. H. Clark*

77 Development of bioreactors for application of biocatalysts in biotransformations and bioremediation
S. G. Burton

85 Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation
V. Kesavan, D. Dhar, Y. Koltypin, N. Perkas, O. Palchik, A. Gedanken, and S. Chandrasekaran

93 Peroxometal-mediated environmentally favorable route to brominating agents and protocols for bromination of organics
U. Bora, M. K. Chaudhuri, D. Dey, and S. S. Dhar

103 Catalysis for green chemistry
J. H. Clark

113 Green chemistry. Sustaining a high-technology civilization
A. Ghosh, S. S.Gupta, M. J. Bartos, Y. Hangun, L. D. Vuocolo, B. A. Steinhoff, C. A. Noser, D. Horner, S. Mayer, K. Inderhees, C. P. Horwitz, J. Spatz, A. D. Ryabov, S. Mondal, and T. J. Collins

119 Rapid screening and combinatorial methods in homogeneous organometallic catalysis
J. A. Loch and R. H. Crabtree

129 Polymer–metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase
K. E. Geckeler

137 Human exposure to traffic pollution. Experience from Danish studies
O. Hertel, S. S. Jensen, H. V. Andersen, F. Palmgren, P. Wåhlin, H. Skov, I. V. Nielsen, M. Sørensen, S. Loft, and O. Raaschou-Nielsen

147 Dry media reactions
M. Kidwai

153 Using neoteric solvents in oil shale studies
M. Koel, S. Ljovin, K. Hollis, and J. Rubin

161 Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms
A. Loupy, L. Perreux, M. Liagre, K. Burle, and M. Moneuse

167 Selective biotransformation reactions on (±)-aryl alkyl ketones, (±)-benzoxazines, and D-*arabino*- and D-*threo*-hydroxyalkyltriazoles
Raunak, A. K. Prasad, N. A. Shakil, Himanshu, and V. S. Parmar

175 Applications of green chemistry in the manufacture of oligonucleotide drugs
Y. S. Sanghvi, V. T. Ravikumar, A. N. Scozzari, and D. L. Cole

181 Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method
R. K. Sharma

187 Recent progress in the chemistry of multicomponent reactions
I. Ugi

193 Solvent-free accelerated organic syntheses using microwaves
R. S. Varma

199 Green twist to an old theme. An eco-friendly approach
J. S. Yadav and H. M. Meshram

FEBRUARY

Lectures presented at the XIXth International Conference on Organometallic Chemistry (XIX ICOMC), Shanghai, China, 23–28 July 2000

vi Preface, *C. T. Qian and X. L. Hou*

Centennial lectures

205 Organometallic chemistry. Past, present, and future
A. Yamamoto

209 Organometallic chemistry at the threshold of a new millennium. Retrospect and prospect
J. Halpern

Plenary lectures

221 Cooperative bimetallic oxidative addition reactions
C. Jin Qin, A. Gavrilova, and B. Bosnich

227 Asymmetric hydrogenation via architectural and functional molecular engineering
R. Noyori, M. Koizumi, D. Ishii, and T. Ohkuma

233 Organometallic pentalene complexes
F. G. N. Cloke

Keynote lectures

239 Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation
E. Negishi

243 Rational design of polymers for optoelectronic interests
T.-Y. Luh, R.-M. Chen, T.-Y. Hwu, S. Basu, C.-W. Shiau, W.-Y. Lin, B.-Y. Jin, and C.-C. Hsu

247 Effect of ligands on the divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones
X. Lu and Q. Zhang

251 New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities
A. Sen

255 Racemic catalysis through asymmetric activation
K. Mikami, T. Korenaga, Y. Matsumoto, M. Ueki, M. Terada, and S. Matsukawa

261 Chemical nitrogen fixation by using molybdenum and tungsten complexes
M. Hidai and Y. Mizobe

Invited lectures

265 Synthesis of oxygen heterocycles via alkynyltungsten compounds
R.-S. Liu

271 Selective preparation of benzene derivatives from three different alkynes and pyridine derivatives from two different alkynes and a nitrile
T. Takahashi

275 Fullerenes covalently linked to transition metals with organic ligands
V. I. Sokolov, M. N. Nefedova, T. V. Potolokova, and V. V. Bashilov

279 Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups
H. Schumann, M. Glanz, J. Gottfriedsen, S. Dechert, and D. Wolff

283 Asymmetric synthesis by stereocontrol
Y. H. Kim, S. M. Kim, and S. W. Youn

287 New methods for the synthesis of transition-metal fullerene complexes
D. M. Thompson, J. McLeod, and M. C. Baird

291 Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts
Z. Hou, S. Kaita, and Y. Wakatsuki

295 Novel coordination behavior of unsaturated hydrocarbon ligands on Pd–Pd bonds
H. Kurosawa and T. Murahashi

299 Recent advances in asymmetric catalysis. Synthetic applications to biologically active compounds
J.-P. Genet, A. Marinetti, and V. Ratovelomanana-Vidal

305 Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands
L.-C. Song and D.-S. Guo

311 Copper complexes for catalytic, aerobic oxidation of hydrocarbons
S.-I. Murahashi, N. Komiya, Y. Hayashi, and T. Kumano

315 Alkane activation on a multimetallic site
H. Suzuki, A. Inagaki, K. Matsubara, and T. Takemori

319 New developments in transition metal-catalyzed synthetic reactions via C–H bond activation
Y. Fujiwara and C. Jia

325 Asymmetric synthesis with "privileged" ligands
M. Bandini, P. G. Cozzi, and A. Umani-Ronchi

331 Reactions of d^0 alkylidene and amide complexes with silanes
J. B. Diminnie, X. Liu, H. Cai, Z. Wu, J. R. Blanton, Tianniu Chen, A. A. Tuinman, K. T. Quisenberry, C. E. Vallet, R. A. Zuhr, D. B. Beach, Z. Peng, Y.-D. Wu, T. E. Concolino, A. L. Rheingold, and Z. Xue

337 Chemistry of 1,2-allenyl/propargyl metal species. A personal account
S.-M. Ma and A.-B. Zhang

343 Interplay of synthesis and mechanism in asymmetric homogeneous catalysis
N. J. Adams, J. Bargon, J. M. Brown, E. J. Farrington, E. Galardon, R. Giernoth, H. Heinrich, B. D. John, and K. Maeda

347 Asymmetric catalysis with "planar-chiral" heterocycles
G. C. Fu

351 Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers
J. Okuda, S. Arndt, K. Beckerle, K. C. Hultzsch, P. Voth, and T. P. Spaniol

355 Chemistry of η^5-fullerene metal complexes
E. Nakamura and M. Sawamura

361 New class of metallacarboranes incorporating the η^7-carboranyl ligand
Z. Xie

367 New metallocenes of early transition metals with functional groups in organic ligands. Red-ox transformations
E. P. Krut'ko, M. V. Borzov, E. N. Veksler, R. S. Kirsanov, A. V. Churakov, and D. A. Lemenovskii

373 New P-chirogenic diphosphines and their use in catalytic asymmetric reactions
T. Imamoto

IUPAC Recommendations and Technical Reports

377 Names for muonium and hydrogen atoms and their ions (IUPAC Recommendations 2001)
W. H. Koppenol

381 Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts (IUPAC Recommendations 2001)
L. B. McCusker, F. Liebau, and G. Engelhardt

MARCH

Lectures presented at the XVIIIth IUPAC Symposium on Photochemistry, Dresden, Germany, 22–27 July 2000

vi Preface, *H. J. Kuhn*

395 Twentieth century developments in photochemistry. Brief historical sketches
H. D. Roth

405 Dynamic solvatochromism in solvent mixtures
D. E. Wetzler, C. Chesta, R. Fernandez-Prini, and P. F. Aramendia

411 Photoactive pyrene-containing receptors for transition-metal ions
F. Fages, S. Leroy, T. Soujanya, and J.-E. Sohna Sohna

415 Tryptophan rotamers that report the conformational dynamics of proteins
J. Fidy, M. Laberge, B. Ullrich, L. Polgar, Z. Szeltner, J. Gallay, and M. Vincent

421 Charge separation and energy transfer in multicomponent porphyrinic arrays
L. Flamigni

425 Conjugated polymers. New materials for optoelectronic devices
R. H. Friend

431 Looking at the photodynamics of individual fluorescent molecules and proteins
M. F. Garcia-Parajó, J.-A. Veerman, L. Kuipers, and N. F. van Hulst

435 Microscopy and optical manipulation of dendrimer-built vesicles
T. Gensch, K. Tsuda, G. C. Dol, L. Latterini, J. W. Weener, A. P. H. J. Schenning, J. Hofkens, E. W. Meijer, and F. C. De Schryver

443 Organometallic alkane and noble-gas complexes in conventional and supercritical fluids
G. I. Childs, D. C. Grills, X. Z. Sun, and M. W. George

449 Long-distance charge transport through DNA. An extended hopping model
B. Giese, M. Spichty, and S. Wessely

455 New approach to silver halide photography using radical cation chemistry
I. R. Gould, J. R. Lenhard, A. A. Muenter, S. A. Godleski, and S. Farid

459 Molecular photovoltaics that mimic photosynthesis
M. Grätzel

469 Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices
A. R. Holzwarth, M. Katterle, M. G. Müller, Y.-Z. Ma, and V. Prokhorenko

475 Vital role of entropy in photochirogenesis
Y. Inoue, N. Sugahara, and T. Wada

481 Photosensitization by drugs
M. A. Miranda

487 Important photochemical processes in the atmosphere
G. K. Moortgat

491 New polymeric photosensitizers
M. Nowakowska, M. Kępczyński, and K. Szczubialka

497 Photophysics of π-conjugated metal–organic oligomers
Y. Li, C. E. Whittle, K. A. Walters, K. D. Ley, and K. S. Schanze

503 Luminescent sensors and photonic switches
A. P. de Silva, D. B. Fox, T. S. Moody, and S. M. Weir

513 Protein dynamics detected by the time-resolved transient grating technique
M. Terazima

519 Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions
S. Tero-Kubota

525 Coherent control for ultrafast photochemical reactions
R. de Vivie-Riedle, L. Kurtz, and A. Hofmann

529 Quinone methide intermediates in organic photochemistry
P. Wan, D. W. Brousmiche, C. Z. Chen, J. Cole, M. Lukeman, and M. Xu

535 Molecular and biomolecular optoelectronics
I. Willner and B. Willner

543 Molecular design of luminescent metal-based materials
V. W.-W. Yam

Lectures presented at the 22nd IUPAC International Symposium on the Chemistry of Natural Products, São Carlos, Brazil, 3–8 September 2000

viii Preface, *O. R. Gottlieb and M. F. das Graças Fernandes da Silva*

549 Bracken adaptation mechanisms and xenobiotic chemistry
M. E. Alonso-Amelot, A. Oliveros, M. P. Calcagno, and E. Arellano

555 Bioactive natural products as a potential source of new pharmacophores. A theory of memory
Atta-ur-Rahman and M. I. Choudhary

561 Gains achieved by molecular approaches in the area of lignification
A.-M. Boudet and M. Chabannes

567 Natural products from around the world
J. D. Connolly

573 Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids
D. Enders and C. Thiebes

579 Chemistry and biotransformations in the Scrophulariaceae family
J. A. Garbarino, B. M. Fraga, M. G. Hernandez, M. C. Chamy, and M. Piovano

583 Quantitative chemobiology
O. R. Gottlieb, M. R. de M. B. Borin, and N. R. S. de Brito

589 Bioactive compounds from coral reef invertebrates
T. Higa, J. Tanaka, I. I. Ohtani, M. Musman, M. C. Roy, and I. Kuroda

595 Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library
D. G. I. Kingston

601 Recent results in the synthesis of ecologically important bioregulators
K. Mori

607 Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program
T. Norin

613 Molecules and macromolecules involved in chemical communication of scarab beetles
W. S. Leal

617 Strategies for the isolation and identification of trypanocidal compounds from the Rutales
P. C. Vieira, J. Mafezoli, M. T. Pupo, J. B. Fernandes, M. F. das G. F. da Silva, S. de Albuquerque, G. Oliva, and F. Pavão

623 Studies directed toward the preparation of key intermediates for the synthesis of trisporic acids and cassiol
M. I. Colombo, J. Zinczuk, M. P. Mischne, and E. A. Rúveda

APRIL

IUPAC Recommendations and Technical Reports

627 Figures-of-merit for the technical development and application of advanced oxidation technologies for both electric- and solar-driven systems (IUPAC Technical Report)
J. R. Bolton, K. G. Bircher, W. Tumas, and C. A. Tolman

639 Organic photochromism (IUPAC Technical Report)
H. Bouas-Laurent and H. Dürr

667 Atomic weights of the elements 1999 (IUPAC Technical Report)
T. B. Coplen

685 Lexicon of lipid nutrition (IUPAC Technical Report)
J. Beare-Rogers, A. Dieffenbacher, and J. V. Holm

745 Measurement and analysis of results obtained on biological substances with differential scanning calorimetry (IUPAC Technical Report)
H.-J. Hinz and F. P. Schwarz

MAY

Lectures presented at the 9th IUPAC International Symposium on Solubility Phenomena (9th ISSP), Hammamet, Tunisia, 25–28 July 2000

iv Preface, *P. G. T. Fogg, H. Gamsjäger, and M. Gaune-Escard*

761 Treatment of Tunisian salt lakes using solubility phase diagrams
N. Kbir-Ariguib, D. B. H. Chehimi, and L. Zayani

771 Phase diagrams at high temperature and high pressure. Determination and consequent developments
M. Th. Cohen-Adad

785 Thermodynamic modeling of crystal deposition in humans
E. Königsberger and L.-C. Königsberger

799 Dissolution and formation of nuclear materials in molten media
T. Ogawa and K. Minato

807 Solid-state solubility and its limits. The alkali halide case
H. A. J. Oonk

825 Reliable solubility data in the age of computerized chemistry. Why, how, and when?
J. Rumble, Jr., A. Y. Lee, D. Blakeslee, and S. Young

831 Solubility equilibria in multicomponent oceanic salt systems from t = 0 to 200 °C. Model parameterization and databases
W. Voigt

IUPAC Recommendations and Technical Reports

845 Definitions of basic terms relating to low-molar-mass and polymer liquid crystals (IUPAC Recommendations 2001)
M. Barón

JUNE

IUPAC Recommendations and Technical Reports

897 Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms (IUPAC Technical Report)
C. B. Bucknall

913 Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics (IUPAC Technical Report)
M. Kozlowski and C. B. Bucknall

927 Unit "katal" for catalytic activity (IUPAC Technical Report)
R. Dybkaer

933 Human exposure to outdoor air pollution (IUPAC Technical Report)
O. Hertel, F. A. A. M. De Leeuw, O. Raaschou-Nielsen, S. S. Jensen, D. Gee, O. Herbarth, S. Pryor, F. Palmgren, and E. Olsen

959 On the discovery of the elements 110–112 (IUPAC Technical Report)
P. J. Karol, H. Nakahara, B. W. Petley, and E. Vogt

969 Retention parameters in chromatography (IUPAC Recommendations 2001)
J. A. García Domínguez, J. C. Díez-Masa, and V. A. Davankov

993 Risk assessment for occupational exposure to chemicals. A review of current methodology (IUPAC Technical Report)
R. F. M. Herber, J. H. Duffus, J. M. Christensen, E. Olsen, and M. V. Park

JULY

Lectures presented at the 38th IUPAC Congress/World Chemistry Congress 2001, Brisbane, Australia, 1–6 July 2001

iv Preface, *G. Will*

1033 Integrating natural product synthesis and combinatorial chemistry
A. Ganesan

1041 Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles
J. L. Sessler, R. S. Zimmerman, C. Bucher, V. Král, and B. Andrioletti

1059 Unsaturated binuclear homoletpic metal carbonyls $M_2(CO)_x$ (M = Fe, Co, Ni; x = 5, 6, 7, 8). Are multiple bonds between transition metals possible for these molecules?
H. F. Schaefer III and R. B. King

1075 Recent applications of tricarbonyliron-diene complexes to organic synthesis
H.-J. Knölker, A. Braier, D. J. Bröcher, S. Cämmerer, W. Fröhner, P. Gonser, H. Hermann, D. Herzberg, K. R. Reddy, and G. Rohde

1087 Benign by design. New catalysts for an environmentally conscious age
J. M. Thomas, R. Raja, G. Sankar, R. G. Bell, and D. W. Lewis

1103 New methods for high-throughput synthesis
S. Kobayashi and R. Akiyama

1113 Applications of "planar-chiral" heterocycles in asymmetric catalysis
G. C. Fu

1117 New developments in dimethyl carbonate chemistry
P. Tundo

1125 Strategy for globalization of chemical education based on the Internet
Y. Takeuchi, M. M. Ito, and H. Yoshida

1137 Crystalline inclusion complexes as media of molecular recognitions and selective reactions
F. Toda

Lectures presented at the 8th International Chemistry Conference in Africa (8th ICCA), 30 July–4 August 2001, Dakar, Sénégal

vi Preface, *A. Samb*

1147 Use and distribution of organochlorine pesticides. The future in Africa
S. O. Wandiga

1157 Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest
J. S. Yadav, M. Y. Valli, and A. R. Prasad

1163 Bioremediation. An overview
M. Vidali

1173 From classical antimalarial drugs to new compounds based on the mechanism of action of artemisinin
A. Robert, F. Benoit-Vical, O. Dechy-Cabaret, and B. Meunier

1189 Synthesis of nucleoside analogs and new Tat protein inhibitors
A. Ané, G. Prestat, G. T. Manh, M. Thiam, S. Josse, M. Pipelier, J. Lebreton, J. P. Pradère, and D. Dubreuil

1197 Recent results from natural product research at the University of Botswana
R. R. T. Majinda, B. M. Abegaz, M. Bezabih, B. T. Ngadjui, C. C. W. Wanjala, L. K. Mdee, G. Bojase, A. Silayo, I. Masesane, and S. O. Yeboah

1209 Teaching chemistry from a societal perspective
S. A. Ware

1215 UNESCO/IUPAC–CTC global program in microchemistry
J. D. Bradley

1221 American Chemical Society assistance to chemical scientists and engineers in developing countries
J. M. Malin

1225 Spontaneous fission half-lives for ground-state nuclides (IUPAC Technical Report). Errata
N. E. Holden and D. C. Hoffman

AUGUST

Lectures presented at the IUPAC CHEMRAWN XIV Conference on Green Chemistry: Toward Environmentally Benign Processes and Products, Boulder, Colorado, USA, 9–13 June 2001

iv Preface, *D. L. Hjeresen and P. T. Anastas*

Global Issues. Chemistry and the Environment

1229 Chemistry in the 21st century. A central science or a "back office" technical activity?
M. L. Good

1231 Implementing green chemistry. An environmental policy for sustainability
J. Thornton

1237 Green chemistry and the global water crisis
D. L. Hjeresen

1243 Green chemistry as systems science
T. E. Graedel

Education and International Programs

1247 Greening the curriculum. American Chemical Society education programs
S. A. Ware

1251 Centre for Green Chemistry, Monash University, Australia
J. L. Scott, C. L. Raston, C. R. Strauss, and W. R. Jackson

1257 Teaching green chemistry. Third-year-level module and beyond
C. L. Raston and J. L. Scott

1261 Green chemistry in India
M. Kidwai

Industrial Processes and Practice

1265 Emergence of a sustainable business community
J. Fiksel

1269 Integrating green chemistry and sustainability into a specialty chemical company
K. H. Reinert

1273 Sustainability metrics for vehicles
J. L. Sullivan

1277 Integrated emissions management for automotive painting operations
B. R. Kim, E. M. Kalis, and J. A. Adams

Scientific Advances in Green Chemistry

1281 Developments in CO_2 research
J. A. Behles and J. M. DeSimone

1287 Supercritical fluid extraction of Z-sabinene hydrate-rich essential oils from Romanian *Mentha* hybrids
E. Gh. Pop and D. Barth

1293 Supercritical fluids-assisted micronization techniques. Low-impact routes for particle production
E. Reverchon and G. Della Porta

1299 Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer®
R. E. Sievers, E. T. S. Huang, J. A. Villa, J. K. Kawamoto, M. M. Evans, and P. R. Brauer

1305 Green electrochemistry. Examples and challenges
M. A. Matthews

1309 Solvent-free preparation of ionic liquids using a household microwave oven
R. S. Varma and V. V. Namboodiri

1315 Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water
T. Huang, S. Venkatraman, Y. Meng, T. V. Nguyen, D. Kort, D. Wang, R. Ding, and C.-J. Li

1319 Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface
J. A. Gladysz

1325 Improving self-defense in plants. Martial arts for vegetables
P. Moyna and H. Heinzen

IUPAC Recommendations and Technical Reports

1331 Modeling lifetime and degradability of organic compounds in air, soil, and water systems (IUPAC Technical Report)
A. Sabljic and W. Peijnenburg

1349 Use of Legendre transforms in chemical thermodynamics (IUPAC Technical Report)
R. A. Alberty

1381 Selectivity in analytical chemistry (IUPAC Recommendations 2001)
J. Vessman, R. I. Stefan, J. F. van Staden, K. Danzer, W. Lindner, D. T. Burns, A. Fajgelj, and H. Müller

SEPTEMBER

Plenary lectures presented at the Hungarian–German–Italian–Polish Joint Meeting on Medicinal Chemistry, Budapest, Hungary, 2–6 September 2001

iv Preface, *F. Fülöp*

1387 Molecular recognition at kappa opioid receptors
P. S. Portoghese

1393 Semicarbazide-sensitive amine oxidase. Its physiological significance
K. Magyar, Z. Mészáros, and P. Mátyus

1401 Chemical development of the vasopressin receptor 2 antagonist SR-121463
I. Hermecz, A. Sánta-Csutor, C. Gönczi, G. Héja, É. Csikós, K. Simon, Á. Smelkó-Esek, and B. Podányi

1411 New developments in A_1 and A_2 adenosine receptor antagonists
K. Kieć-Kononowicz, A. Drabczyńska, E. Pękala, B. Michalak, C. E. Müller, B. Schumacher, J. Karolak-Wojciechowska, H. Duddeck, S. Rockitt, and R. Wartchow

1421 Antitumor acridines with diaminoalkylo pharmacophoric group
J. Konopa

1429 NMR spectroscopy in drug design
M. Heller and H. Kessler

1437 Retinoic acid and analogs as potent inducers of differentiation and apoptosis. New promising chemopreventive and chemotherapeutic agents in oncology
D. Simoni, R. Rondanin, R. Baruchello, M. Roberti, M. Rossi, S. Grimaudo, N. D'Alessandro, F. P. Invidiata, and M. Tolomeo

1445 New chemical structures of hypolipidemic and antiplatelet activity
Z. Chilmonczyk, D. Siluk, R. Kaliszan, B. Łozowicka, J. Popławski, and S. Filipek

1459 New small-molecule tubulin inhibitors
G. Bacher, T. Beckers, P. Emig, T. Klenner, B. Kutscher, and B. Nickel

1465 Gradient HPLC in the determination of drug lipophilicity and acidity
R. Kaliszan, P. Haber, T. Bączek, and D. Siluk

1477 Rational design and synthesis of homochiral azole antifungal agents
M. Botta, F. Corelli, F. Manetti, C. Mugnaini, and A. Tafi

1487 Combinatorial chemistry. Facing the challenge of chemical genomics
F. Darvas, G. Dorman, L. Urge, I. Szabo, Z. Ronai, and M. Sasvari-Szekely

1499 Opioid and sigma receptor studies. New developments in the design of selective sigma ligands
G. Ronsisvalle, A. Marrazzo, O. Prezzavento, A. Cagnotto, T. Mennini, C. Parenti, and G. M. Scoto

IUPAC Recommendations and Technical Reports

1511 Generic source-based nomenclature for polymers
(IUPAC Recommendations 2001)
E. Maréchal and E. S. Wilks

1521 Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon)
(IUPAC Technical Report)
R. Janoschek

OCTOBER

Lectures presented at the IUPAC International Congress on Analytical Sciences 2001 (ICAS2001), Tokyo, Japan, 6–10 August 2001

iv Preface, *Y. Umezawa*

1555 Miniaturization and chip technology. What can we expect?
A. Manz and J. C. T. Eijkel

1563 Capillary electrophoretic techniques toward the metabolome analysis
S. Terabe, M. J. Markuszewski, N. Inoue, K. Otsuka, and T. Nishioka

1573 Threading intercalation to double-stranded DNA and the application to DNA sensing. Electrochemical array technique
M. Takagi

1579 Evolution and revolution in instrumentation for plasma-source mass spectrometry
G. M. Hieftje, J. H. Barnes, O. A. Grøn, A. M. Leach, D. M. McClenathan, S. J. Ray, D. A. Solyom, W. C. Wetzel, M. B. Denton, and D. W. Koppenaal

1589 Exploring new opportunities with sum-frequency nonlinear optical spectroscopy
Y. R. Shen

1599 Selective detection of neurotransmitters by fluorescence and chemiluminescence imaging
Z. Wang and E. S. Yeung

1613 Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy
T. Sawada

IUPAC Recommendations and Technical Reports

1625 Standards in isothermal microcalorimetry (IUPAC Technical Report)
I. Wadsö and R. N. Goldberg

1641 Critical evaluation of stability constants of phosphonic acids (IUPAC Technical Report)
K. Popov, H. Rönkkömäki, and L. H. J. Lajunen

NOVEMBER

Plenary lectures presented at the 27th International Conference on Solution Chemistry, Vaals, The Netherlands, 26–31 August 2001

iii Preface, *B. J. Gill*

1679 Subtle order in settling suspensions
B. J. Ackerson, X. L. Lei, and P. Tong

1689 Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging
P. H. Fries, J. Richardi, S. Rast, and E. Belorizky

1705 Charge-stabilized colloidal suspensions. Phase behavior and effects of confinement
R. Klein and H. H. von Grünberg

1721 Using simulation to study solvation in water
R. M. Lynden-Bell, J. C. Rasaiah, and J. P. Noworyta

1733 Corresponding states for electrolyte solutions
H. Weingärtner

IUPAC Recommendations and Technical Reports

1749 Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry (IUPAC Recommendations 2001)
A. N. Davies, J. Lambert, R. J. Lancashire, P. Lampen, W. Conover, M. Frey, M. Grzonka, E. Williams, and D. Meinhart

1765 JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data (IUPAC Recommendations 2001)
J. I. Baumbach, A. N. Davies, P. Lampen, and H. Schmidt

1783 Molality-based primary standards of electrolytic conductivity (IUPAC Technical Report)
K. W. Pratt, W. F. Koch, Y. C. Wu, and P. A. Berezansky

1795 NMR nomenclature. Nuclear spin properties and conventions for chemical shifts (IUPAC Recommendations 2001)
R. K. Harris, E. D. Becker, S. Cabral de Menezes, R. Goodfellow, and P. Granger

DECEMBER

Special Topic Issue on Electrochemistry and Interfacial Chemistry for the Environment

iii Foreword, *G. S. Wilson*

iv Preface, *C. Brett*

1819 Electrochemical technology for environmental treatment and clean energy conversion
F. C. Walsh

1839 Photocatalytic transformation of organic compounds in the presence of inorganic ions
P. Calza and E. Pelizzetti

1849 Titania-based heterogeneous photocatalysis. Materials, mechanistic issues, and implications for environmental remediation
K. Rajeshwar, C. R. Chenthamarakshan, S. Goeringer, and M. Djukic

1861 New inhibitors for copper corrosion
Gy. Vastag, E. Szöcs, A. Shaban, and E. Kálmán

1871 Green processes for environmental application. Electrochemical ozone production
L. M. Da Silva, L. A. De Faria, and J. F. C. Boodts

1885 Direct electrochemistry of nanoparticulate Fe_2O_3 in aqueous solution and adsorbed onto tin-doped indium oxide
K. J. McKenzie and F. Marken

1895 Green synthesis via electrolysis in microemulsions
J. F. Rusling

1907 Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions
W. G. Kiflom, S. O. Wandiga, and G. N. Kamau

1917 Electrochemical approaches to alleviation of the problem of carbon dioxide accumulation
C. M. Sánchez-Sánchez, V. Montiel, D. A. Tryk, A. Aldaz, and A. Fujishima

1929 Oxidation of chlorophenols on Pt electrode in alkaline solution studied by cyclic voltammetry, galvanostatic electrolysis, and gas chromatography–mass spectrometry
Z. Ežerskis and Z. Jusys

1941 Intramolecular cyclization of propargyl derivatives using environmentally friendly methodologies
E. Duñach, A. P. Esteves, A. M. Freitas, M. A. Lemos, M. J. Medeiros, and S. Olivero

1947 Biphasic sonoelectrosynthesis. A review
J. D. Wadhawan, F. Marken, and R. G. Compton

1957 Degradation of dye effluent
J. P. Lorimer, T. J. Mason, M. Plattes, S. S. Phull, and D. J. Walton

1969 Electrochemical sensors for environmental monitoring. Strategy and examples
C. M. A. Brett

1979 Direct electrochemistry of redox proteins or enzymes at various film electrodes and their possible applications in monitoring some pollutants
N. Hu

1993 Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane
P. V. Climent, M. L. M. Serralheiro, and M. J. F. Rebelo

2001 Chalcogenide-based chemical sensors for atmospheric pollution control
S. Marian, D. Tsiulyanu, T. Marian, and H.-D. Liess

2005 Humic matter and contaminants. General aspects and modeling metal ion binding
L. K. Koopal, W. H. van Riemsdijk, and D. G. Kinniburgh

2017 Hydrolyzing metal salts as coagulants
J. Gregory and J. Duan

2027 Effect of colloids on radionuclide migration for performance assessment of HLW disposal in Japan
S. Kurosawa and S. Ueta

2039 Extraction and separation of metal cations in solution by supported liquid membrane using lasalocid A as carrier
L. Canet and P. Seta

2047 Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers
D. G. Mancosky and L. A. Lucia

2059 Effect of lignin content and magnesium-to-manganese ratio on the selectivity of oxygen delignification in softwood kraft pulp
L. A. Lucia and R. S. Smereck
